how useful has the PDMP been so far in helping clinicians consult with each other about possible prescription misuse by patients?

How often do you use the information in the PDMP system?

Large and Medium Barriers to Using the PDMP

Common Free Responses: Experience accessing Patient info?

- Interface is poorly designed and cumbersome. Redundant screens with too many clicks before search is performed.
- Site logs out automatically too quickly.
- Difficult to locate patient. (hyphenated names, nick-names, suffixes)
- Improved method to access other states PDMPs is needed

Common Free Responses: What Prompts use of the PDMP

- New patient with a rx for a controlled substance
- All controlled rx's
- Suspicious filling. (large quantity, cash pay, out of area)
- Clinician request.
- Company policy requires use
